

KITCHEN & FOOD SERVICE SOLUTIONS: MANUAL CLOSED LOOP DOSING

Waterless dosing with safety, security and user simplicity

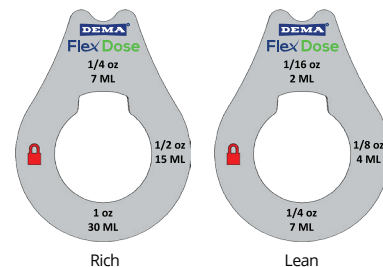

Incorporating the safety and accuracy of DEMA's SafeLink™ closed loop inserts, the FlexDose dispenser is designed to provide common sense and safe solutions for the waterless dispensing applications. Multiple configurations are available with dosing increments of 1/16, 1/8, 1/4, 1/2 and 1oz pump strokes. Using our unique anti-reverse pull pump, end users cannot half dose a product, avoiding common issues of other hand pumps on the market. Our no-drip valve ensures that even the leanest of doses doesn't get abused, delivering the right amount of chemical each and every time.

Features & Benefits

- Designed for SafeLink closed loop inserts to dose bottles, buckets, sinks and more
- With SafeLink, FlexDose works with the lock and key system for proprietary or product inserts
- The widest dosing range possible from 1/16oz to 1oz (2ml to 30ml)
- Dosing lock to avoid incorrect or partial dosing activation
- Chemically compatible seals for the most common chemicals for housekeeping and food service applications
- Large branding and instruction label area for clear direction and use
- Bottle connection available in 13 standard colors
- Better accuracy with full dose requirement, correct dose every time
- Better reliability and durability for years of service

Operational Features:

Large branding and instruction label area for easy identification of product

Key connection for product and proprietary SafeLink inserts

Applications for FlexDose:

Bottle dosing

Mop bucket dosing

Sink dosing
